# **How to check if your router supports 100M fiber optic internet**

## Overview

---

When selecting a router for fiber optic internet, ensure it is a "fiber compatible router" with a Gigabit WAN port. Make sure your router supports the speeds provided by your ISP and consider factors like Wi-Fi standards and. It's very likely your particular ISP needs a media convertor which is probably what they're referring to as an adapter. What does my fibre checker result mean?

Broadband services are available at your address. You can try one of the most popular sites: <https://> or use its app <https://> to test the internet speed using your PC/smartphone.
