How to connect the FFU distribution box

Overview

Connect the GST 18-3 connector system 1 and the RJ45 plug 3 of the control line to the socket provided for this purpose in the connection box of the FFU. The Relcom Mega Block has labeled pluggable connectors the cable is terminated at. FF sends both power and digital transmission across a single pair of wires, which is different from the standard. The card embeds a web server accessible on port 80 with a browser at <serialnumber>.
