How to connect the fiber optic coupler connector

Overview

Direct connection: If you're connecting two fiber optic cables directly, use a fiber optic coupler (also known as an adapter). Fiber optic adapters, also known as couplers, play a crucial role in fiber optic networks by providing a connection point between two fiber optic connectors. It enables optical signals to pass from one fiber to another with minimal loss, ensuring stable and reliable communication. Are you interested in seeing how fiber optic connectors get mechanically plugged into an adapter?

This video goes over common types of connectors, their respective adapters, and how to properly connect and disconnect them. There are many types of fiber optic connectors, including SC, LC, FC, ST, D4, MU, MT/MPO, etc.
