How to connect the single-sided power cord of a T8 integrated LED

Overview

To install, wire the non-shunted sockets by connecting one wire from the lamp holder to the branch circuit L (LIVE) and the other wire to the branch circuit N (NEUTRAL) at the opposite end. In this step-by-step guide, we will walk you through the process of wiring T8 LED tubes directly. The catch with single-ended T8 LED bulbs is: You can direct-wire a 'plug and play' light but not vice-versa. Direct wire LED T8 tubes are a type of LED lighting designed to replace traditional fluorescent tubes. 6) Remove the magnetic baBuy compact fluorescent lamps in retrofit spirals, mini spirals, reflectors, pars, open tubes, globes, dimmable, CFL, decorative and 3-way bulbs for amazing light and energy savings.
