How to patch the fiber optic cable on a switch

Overview

If using a patch panel, connect the other end of the fiber optic cables to the patch panel, which will then connect to the main fiber optic network. Even the most advanced optical transceivers can only perform at their peak when paired with properly installed, clean, and precisely managed fiber. Connecting a fiber patch panel to a switch is a critical step in setting up a fiber optic network. Fiber optic technology is widely used in networking due to its high-speed data transmission capabilities and long-distance coverage.
