How to seal fireproof cable tray holes

Overview

When cable trays pass through walls or floors, seal openings using fire-rated penetration sealing materials. FIRSTO fire stops are developed as a modular system which is simple to assemble around the cable run against the wall or on the floor. The need to provide fire sealing is a fundamental requirement of the Building Regulations in England, Wales, Scotland and Northern Ireland and is recognised in Regulation Group 527. Avoid cable fires and stop them safely! KBS ® offers various solutions to effectively protect cable penetrations from the passage of flames and smoke. In most cases, the task is to seal off complex cable systems and cables on support constructions. Route Planning and Layout Principles Coordinate with Building Structure: Cable tray routing should align with architectural design, avoiding unnecessary.
