# **How to seal the upper part of the distribution box**

## Overview

---

Non-hardening electrical putty, also known as duct seal compound or mastic, is the preferred material for sealing wire entries directly inside the box. This includes the rear wall, side panels, doors, door handle and ventilation grille with climate filter for the air intake. After choosing your inlet/outlet holes and cutting them out, the seal is easy to install. Mounting bracket is a flexible structure, which makes it easy to adjust or replace the electrical components. When installing outdoor junction box, ensure that the sealing strip or waterproof ring of weather proof box is in close contact with the surface of outdoor weatherproof box to prevent water from penetrating outdoor electrical junction box.
