How to set up a router with gigabit fiber optic internet

Overview

To set up your router for fiber internet quickly, connect the router to your fiber modem, access the router's settings via a web browser, and input the provided ISP credentials. Make sure to update the firmware, configure Wi-Fi security, and customize your network name for optimal performance. However, if you're not accustomed to some of the jargon, like MAC cloning and PPPoE, you may encounter a few. However, setting up a fiber optic connection to your router can seem daunting if you're unfamiliar with the process. Fiber optic internet is generally installed in the following 5 steps, which we'll dive deeper into throughout the article: A technician checks your area and prepares the connection from the neighborhood fiber network.
