How wide should the network cabinet be

Overview

Almost all networking cabinets follow the EIA-310 standard, which specifies a 19-inch internal mounting width. This universal standard ensures that equipment from any manufacturer will fit properly in your cabinet. Think of it like a specialized bookshelf, but instead of books, it holds servers, switches, routers, and other networking gear. Server rack is most commonly use in data center environments, but you can also found it in smaller.
