Huawei upgrades core switches

Overview

CloudEngine S12700H series switches are Huawei's next-generation modular core/aggregation switches designed for high-end campus networks in the all-wireless era of Wi-Fi 6/7. S16700 series switches consist of two models with four Line Processing Unit (LPU) slots and eight LPU slots respectively. Huawei campus switches are ideal for building future-proof campus networks with simplified management, high reliability, and service intelligence, across industries such as enterprises, governments, education, finance, and manufacturing. After more than 20 years of unremitting efforts and stable development, Huawei provides extensive experience in Ethernet switches.

Huawei upgrades core switches

Native AC Solution: Core Switches Function as the Gateway for Wired

In addition, core switches are configured with the native AC function to manage APs and transmit wireless service traffic on the entire network, implementing wired and wireless convergence.

Huawei Core Switch: Network's Beating Heart? Can Centralized

Traditional core switches fail catastrophically--one power supply dies, and the whole network flatlines. The Huawei core switch employs N+1 power redundancy and hot-swappable

Why Is The Huawei CloudEngine 12800 Core Switch A Game

Die Huawei CloudEngine 12800 Core Switch isn't just another piece of hardware--it's the silent powerhouse driving scalability, speed, and security for businesses navigating

CloudEngine S16700 Series Switches , Huawei Enterprise
