In the hotel s electrical distribution box

Overview

At the core of any hotel's electrical system is the distribution box —a hub that splits power from the main supply to different areas, ensuring each section gets the right amount of electricity without overloading. At alfanar we look for advanced solutions that provide safe electricity distribution, are convenient and save energy. Today, most hotels use high-tech hotel key cards which allow guests easy, secure access to their rooms and avoid excess energy consumption when the guests are not in the room. At the same time, we offer building owners maximum cost-effectiveness, electrical planners. Electrical installations are the main source of power for hotel systems - lighting, sockets, power and process consumers, etc. They "bring to life" the processes which create comfort for guests as well as a healthy and efficient working environment for employees.

In the hotel s electrical distribution box
