Inspection of Distribution Box Shell

Overview

The inspection includes checking all cable terminals and connections item by item after unpacking, and also observing the condition of the sealing strips and gaskets of the stainless electrical cabinet enclosure, checking for signs of corrosion or deformation. Regularly scheduled inspections, evaluations, and testing by qualified personnel are critical parts of discharge prevention. They are conducted not only on containers, but also on associated piping, valves, and appurtenances, and. What should be paid attention to in the inspection of distribution box?
