Installation of 12-core fiber optic cable junction box

Overview

OPGW cable joint box installation involves several key stages: selecting the appropriate location, preparing both the cable and the joint box, splicing fibers, and sealing the joint box properly. However, improper installation of OPGW cable joint boxes can jeopardize the entire system. This 12 port fiber access terminal box is designed to connect feeder cables to subscriber drop cables for FTTH last-mile fiber connectivity. In addition, the drawer structure also facilitates high-density wiring and good cable management.
