# **Interconnection between switch ports and optical ports**

## Overview

---

When you connect two 1000BASE-T switches with SFP ports to achieve Gigabit Ethernet, there are two methods: through standard Ethernet cable plugged into the built-in Ethernet ports of each switch, or use the SFP ports with a copper SFP module. This article will discuss the two available interconnection options between 100BASE-T Ethernet switches that come with SFP ports. An all-optical Ethernet switch is a network switch whose service ports are entirely optical, meaning every interface uses fiber rather than copper.
