Internet Data Center Subsidies

Overview

Thirty-six states have statutory data center programs that offer incentive packages based on certain requirements, typically the level of investment, job creation and wages. has more than 4,100 data centers, making it the largest consumer of capacity and positioned well to be a global leader in artificial intelligence ("AI"). 1 According to a Goldman Sachs report, the worldwide demand for power supplied by data centers will rise 50% by 2027. Data centers—massive facilities that power websites, email, video streaming and, increasingly, AI applications— are critical to the digital economy. It is not for sale and may not be used by political parties or groups for electoral campaigning.
