Is it appropriate to mount a meter in a distribution box

Overview

It is prohibited to recess meter bases/panels, conceal service entrance conductors, enclose meter bases/panels in boxes, or mount meter bases/panels so that the center of the meter is lower than approximately 5 feet, and plant flowers, trees and shrubs near. The meter box is the meeting point between the utility grid and the building's electrical system. Individual Distribution Network Operators (DNOs) will issue their own guidelines on the provision of space in meter enclosures as a condition in their "Connection Offer" to customers. In this article, we'll break down everything you need to know—from how close it should be to your main panel, to what safety rules you. Should I just mount the board on the wall, leave the walls, floor, roof and door of the cabinet next to it so the DNO has more working room, then complete the cabinet in their presence (I can probably design it so it will assemble quickly with a couple of screws) or indeed stacked one above the.

Is it appropriate to mount a meter in a distribution box
