Is it better to surface-mount or recess the distribution box

Overview

It avoids messy cutting, protects your budget, and is much quicker to install. When choosing between a recessed weatherproof electrical box and a surface mount weatherproof electrical box, the main deciding factors are installation style, space availability, aesthetics, and long-term maintenance needs. Understanding the core differences ensures you select the perfect fit every time. The installation process for surface-mounted and recessed boxes differs mainly in the placement of the box and the preparation of the wall or surface: Surface-mounted installation: The box is mounted directly to the surface of the wall, usually with screws or brackets. Additionally, recessed mounting requires advanced and precise holes for recessing fixtures, while surface mounting and suspended mounting do not.
