# **Length of fiber optic cable without repeaters**

## Overview

---

Learn exact limits by cable type, application, and how to extend your network. Campus networks (building-to-building): Single-mode with 1000BASE-LX covers up to 5 km — enough to connect buildings across a large university or corporate campus without repeaters. Understanding the distance fiber optic cable can travel is crucial for making informed infrastructure decisions that will serve your business for decades. Participants confirm that multimode fibers are inherently short-range and unlikely to support useful data rates over such distances. Given perfect conditions in a lab-like setting without ensuring no signal degradation, how far could fiber optics transmit data?

Hundreds of.
