Broadband access over all Allows the optical network engineer to build scalable, fault tolerant point-to-multipoint networks to ensure the highest reliability Connect up to 64 SDANs to each

Designing and Analysis of (FTTH) Fiber to the Home Network for the

To premise the situation a bit more: At the "central office" end of the network, you'll find the Optical Line Terminal (OLT) and the Optical Distribution Frames (ODF).

Optical line termination

An optical line termination (OLT), also called an optical line terminal, is a device which serves as the service provider endpoint of a passive optical network. It provides two main functions: 1. to perform conversion between the electrical signals used by the service provider's equipment and the fiber optic signals used by the passive optical network.

GPON SFP Modules Explained: Types, Applications,

What is a GPON SFP Module? GPON SFP (Gigabit Passive Optical Network Small Form-Factor Pluggable) modules are compact, hot-pluggable
