Mg Breakthrough Electrical Smart PDU

Overview

With up to 21 intelligent programmable breakers with a rating up to 125 amps, the SMART PDU I- type, with its 1U design, is compact, hot swappable, and built to meet safety standards. Smart PDU I-Type is a compact 1U DC distribution with intelligent plug-in breakers suitable for applications where individual power and energy monitoring is required for each breaker output. The intelligent breakers also support programmable and remote control functions through RS485 communication. Breakthrough (m&g) pdu cabinet socket is specially designed for you who are pursuing the ultimate power experience. These systems enable outlet-level visibility, remote power control, and integration with monitoring platforms, supporting modern requirements for distributed.

What is a Smart PDU?

A smart PDU goes beyond distributing power to data center IT equipment. It is also capable of monitoring, managing, and controlling power consumption to multiple devices.
