Mk2 distribution box

Overview

Our MK2 Portable Distribution Boxes are designed for outdoor working, we can connect the generator or other power supply with the inlet or extension cable of the box, and connect the electrical devices to the output sockets. These offer flexible power distribution for a variety of applications including construction, industry, mining, events, and more. The design has been improved so these can be stacked to reduce storage space required. Stuart Group Ltd was established in 1982 and has expanded to become one of the largest privately owned independent power generation businesses in the UK.

Mk2 distribution box

POWER DISTRIBUTION SYSTEMS

The Vertical Access Box provides draw-in facilities to allow for a change of plane or direction of the ducting and connection to skirting trunking systems, distribution boards, boxes etc.
