Network cabinet cable management patch panel

Overview

They are commonly used to organize in-wall Ethernet cable runs, with cables running from Ethernet wall jacks to patch panels housed in central server rooms. The panel itself is made from blank ports on one side, and a termination point or keystone jack on the other side. one was designed with the user in mind - for IT engineers by an IT engineer - to keep network racks organized. It makes it easier to connect, disconnect, and reconfigure cables, simplifying connections between devices and making maintenance or upgrades more convenient. Patch panels are a great way to improve your network management by making it simple to organize your cables and connections.

Network cabinet cable management patch panel
