ODF rack for upper cable routing

Overview

The ODF is a purpose-made rack designed to accommodate high density Feeder Panels or Splitter Panels used in FTTH PON networks. The rack can be made as a stand-alone solution, or it can be made as a 'side-by-side' system with integrated cable management in the middle. ODF Optical Distribution Frame, robust steel construction, open frame design for fast and easy access to ODF, 47U fixing positions per 2200mm rack. If using a line-up of greater than two frames side-by-side the maximum number of 4RU enclosure is 10 off (2880F per frame) to allow bottom patch co ont Access Splice Cassette, LC APC.
