One-meter pigtail single-mode

Overview

The pigtail is with Low Smoke Zero Halogen (LSZH) sheath compliant to IEC 60332-3C. It supports LAN, WAN and active device termination to provide a reliable and durable connection. 12 fibers optic pigtails are ideal for fusion splicing the required fiber connectivity for structured cabling systems including Data Centers, Broadband CATV, PON (Passive Optical Network), WDM or DWDM multiplexing, FTTH and voice services in ATM and SONET metropolitan and access networks. Available in LC/PC and SC/PC with OS1 and OS2 fiber types, these pigtails ensure precise optical alignment and long-term durability. Thanks to this solution, the phenomenon of modal dispersion is eliminated, so that single-mode fibers, unlike multimode fibers, have a greater bandwidth and allow data transmission over long. 9 mm tight buffer fibre at length of 1 meter and blue coloured push-pull LC connector terminated on one end.
