Original genuine SFP OSFP optical modules

Overview

OEM SFP modules are small form-factor pluggable (SFP) optical transceivers that are manufactured by original optical component suppliers but sold under the branding and part numbers of major networking equipment vendors such as Cisco, Arista, or Juniper. In the context of POTN (Packet Optical Transport Network) and advanced PON architectures, three form factors— SFP, QSFP, and OSFP —define the standards that connect access, aggregation, and core layers. This article provides a deep, structured analysis of these form factors, explaining their.
