Pft optical module

Overview

25G optical module designed for high-speed data transmission over long distances. Optical modules complying with SFP (Small Form-factor Pluggable) standard are devices converting electrical signal to the optical form and optical signal to the electrical form. Usage media converters with the ability to exchange SFP modules is particularly preferred because of its versatility, for. Ideal for use in network infrastructures such as IP surveillance systems, telecommunication networks, and data centers, this optical module.
