# **Planar waveguide remote monitoring installation**

## Overview

---

The five-step process for waveguide installation is as follows: 1) Check the flatness of the flange surface ( $<0$ . Planar provides extensive online Service & Support resources for our various product lines. The Planar® VM Series is a line of micro, extreme and ultra-narrow bezel LCD displays that provide a video wall solution for the demanding requirements of 24x7 mission-critical applications and high ambient light environments. Planar® WallDirector™ Cloud is a web-based monitoring application that enables organizations to remotely manage their fleet of Planar display solutions deployed around the world.
