Polarization-maintaining fiber optic patch cord 6

Overview

The PM Patchcord series has excellent environmental stability, high return loss, low insertion loss. Polarization Maintaining Fiber Optic Patchcords are available with FC/PC or FC/APC terminated connectors. Other options include cables with high extinction ratio (ER), cables with heating wire, AR-coated patch cables. The PM axis orientation is maintained by using male connectors with a positioning key and a bulkhead female receptacle with a tightly toleranced keyway, ensuring good repeatability in extinction.
