Price of Telecommunication Fiber Optic Cable for Sale

Overview

Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. Ideal for telecommunications, data centres and networking applications, our fibre optic cables are available in single-mode and multimode configurations to meet the specific needs of your system. Main cost drivers include cable grade (indoor vs outdoor, armoured), distance, and labor for trenching, splicing, and termination.
