Production of electrical distribution boxes in the workshop

Overview

Every distribution box undergoes stringent checks: Verify part accuracy, component fit/seating, correct assembly sequence, door latch/hinge function. Customers today not only care about the performance of the electrical panel but also the manufacturing process that ensures quality, safety, and durability. SIA ELDI manufacturing workshops provide the flexibility of the technical solutions, as well as maximum quality in the development of individual solutions of distribution boxes and complex systems. We produce waterproof boxes made of plastic, stainless steel, metal plates, and aluminum NEMA shells, and provide customized and breakthrough solutions for various scenarios. Our Company has been dealing since its foundation with the designing and production of 0. The satisfaction of our Clients proves the success of our many years of experience in this field. Superda electrical box roll forming machine production line for making distribution board, recessed metal board, electrical panel board, control panels, embedded metal cabinet equipment.
