Remote Patch Cord Intelligent Fiber Optic Distribution Frame

Overview

ROME® is a robotic optical switch that offers dynamic fibre cross connect capability at layer-0. It enables physical fibre connections to be made automatically, remotely, quickly, and without on-site manual intervention. The SYSTIMAX® iPatch® HD & UD fiber panels are a component of the imVision® automated infrastructure management (AIM) solution and provide intelligent connectivity to the data center. Improved Network Visibility: Smart patch panels provide remote monitoring of fiber optic links, allowing network administrators to quickly identify issues and take corrective action. Achieve successful cable management, handle high amounts of fiber cable and add density to fiber frames with the new DCX Optical Distribution Frame (ODF) System which features innovations like flippable cassettes, modular frame design and multiple configuration options.
