Router fiber optic indicator light not showing

Overview

What to check: Make sure the power cable is securely plugged into both the ONT and a working wall outlet. The LOS light on your router indicates the status of your internet connection to the Internet Service Provider (ISP). However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. The tables in this article provide detailed information about the possible appearances of the LED lights on each device, the possible causes of each state, and what you should do.

Router fiber optic indicator light not showing
