ST Fiber Optic Attenuator Manufacturer

Overview

, LTD is a Fiber Optic Attenuator with Attenuation 1 to 30 dB, Return Loss >55 to 65 dB, Polarization Dependent Loss <0. Purpose: To describe the Fiberdyne Labs fiber-optic, fixed, single-mode attenuator with ST/UPC connections. As optical passive devices, FS attenuators are mainly used in fiber optic to debug optical power performance & optical instrument calibration correction & fiber signal attenuation to ensure the optical power in a stable and desired level in the link without any changes on its original transmission. When a cable end is inserted into the female end, the remaining male end can be connected to the equipment where the cable would otherwise connect directly, but providing the desired.
