Senegal Low-Voltage Switchgear Complete Set of Equipment

Overview

The combined switchgear includes distribution box, lighting box, metering box, socket box and other products, suitable for 50Hz, 500v below the power, lighting and motor control circuit and protection device, widely used in real estate construction, industrial and mining. ABB Drives is a global technology leader serving industries, infrastructure and machine builders with world-class drives, drive systems and packages. We help our customers, partners and equipment manufacturers to improve energy efficiency, asset reliability, productivity, safety and performance. 69KV electric energy generated by the wind turbine to 35kV, and then transmit it to the wind farm. This is why Siemens switchgear has gained strong acceptance across Senegal - it offers solid protection, long service life, and dependable performance even in challenging African operating conditions. Low-voltage switchgear is used for power users in power plants, power substations, industrial mining enterprises etc.
