Should I use a gigabit router with a 200m fiber optic connection

Overview

For most homes up to 200 m² (or with open layouts where signal must travel ~20–30 meters linearly), a dual-band Gigabit router like the TP-Link EC220-G5 or Intelbras W5 AC1200 is sufficient. Selecting a single router can be challenging, as there are most likely many that fit the requirements you want. We've done the research for you and put together this in-depth guide that lists multiple options, their details, reviews, and pros and cons. The best way to get the fastest possible speeds is to use an Ethernet cable connection between your computer and your router. For fiber, your router needs the right WAN connection, speed support, and Wi-Fi capabilities.
