Should the network cable be plugged into the fiber optic cable or the router

Overview

Running the Cable: They'll connect the fiber from the pole or ground to the NID, making sure it's safe and secure. To connect your fiber optic cable to a router, ensure you have the following: Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). The short answer is no - RJ45 connectors are designed for electrical Ethernet signals, while fiber optics transmit light pulses through glass or plastic. Understand the Basics Before diving in, familiarize yourself with the components involved:.
