# **Stripping the 288-core optical cable**

## Overview

---

In this informative guide, we'll walk you through the step-by-step process of stripping and preparing fibre optic cable for termination, covering techniques, tools, and best practices to help you achieve successful terminations in your fibre optic installations. Properly stripping the cable and preparing the fibre ends ensures a clean and secure connection, leading to optimal signal transmission and network performance. In this instructional video, Bob Licari, Test Equipment Product Manager, demonstrates a simple way to strip optical fiber. Marcel Buijs, EMEA Business Development, Technical Sales, Fiber Optic Center, Inc. In this lesson, we will identify and examine cables, then prepare them for splicing or termination by stripping the cable to expose the coated fibers. Our Voluntary 30-Day Return Guarantee does not affect your legal right of withdrawal in any way.
