Structure inside the Chad distribution box

Overview

Inside a distribution box are components like circuit breakers, earth leakage units, doorbells, and timers. The building's electrical power enters through the main feeding cable, which connects to the distribution board. The internal structure of the distribution box is designed to safely distribute power from the main power source to multiple branch circuits. It is required to assemble switchgear, measuring instruments, protective appliances and auxiliary equipment in a closed or semi-closed metal cabinet or on the screen to form a.
