Switchgear busbar type ais

Overview

It is used for power distribution in systems with busbar currents up to 24 kV, providing users with reliable electrical power facilities. UniGear ZS1 is available in single busbar, double busbar, or double-level configurations, certified for marine and seismic applications, and fully compliant with IEC, GB/DL, CSA, and GOST standards. It's our most popular product: the "DF-2", is a metal-clad and high-quality AIS switchgear solution. Since the switchgear is highly modular type, this make simple selection of components required by any.
