Technical parameters of multimode 10 Gigabit fiber optic cable

Overview

This fiber is a graded-index multimode fiber suitable for transmission speeds of up to 10 Gb/s. Recommended for LANs, SANs and high-speed parallel interconnects for head-ends, central offices and data centers. Apart from the OM1 type, all of them are bending-optimized fiber incorporating technology to deliver enhanced macro-bending performance produced by a unique Plasma Chemical Vapor Deposition. Key factors to consider in the design of 10 Gigabit Ethernet networks are: The network topology, including operating distances, splice losses and numbers of connectors (i. Multimode SFP+ transceivers are compact, hot-pluggable optical modules designed to deliver 10Gbps data transmission over multimode fiber (MMF).
