

# **Telecommunications companies cooperate with tower companies**

## Overview

---

Tower sharing and infrastructure partnerships in the telecommunications sector are reducing costs, promoting sustainability, and expediting remote deployment, supported by regulatory initiatives and government policies. By working effectively together, mobile operators and towercos can overcome the financial, planning and energy challenges they face and build better networks (both indoors and outdoors) for end customers. As they can support multiple operators from a single site, towercos benefit from economies of scale. Our Strategy Consulting teams help CEOs achieve maximum value for stakeholders by designing strategies that improve profitability and long-term value. Halfway through the Digital Decade, neutral host TowerCos have released €53bn of capital to operators to enhance their 4G/5G networks. The telecommunication tower industry in Europe serves as the backbone for mobile and broadband connectivity, providing essential infrastructure that powers communication technologies. A variety of companies, from large telecom giants to specialized tower operators, engage in constructing, managing, and maintaining towers. His departure sparked discussions surrounding the different business models of European tower.
