Testing Standards for Structured Cabling Fiber Optic Cables

Overview

IEC 61280-4-5 provides test methods to measure the attenuation of installed multimode and single-mode optical fibre cabling plant as well as the determination of their polarity and length. They define a minimum baseline of quality and workmanship for installing electrical products and systems. Take a closer look inside our advanced fiber optic production facility — where innovation, precision, and quality come to life. IEC 60794 is the international standard series governing the design, construction, and performance verification of fibre optic cables.
