The H3C core switch fan is too loud

Overview

Why is your Switch fan so loud?

It's often due to dust buildup, inadequate ventilation, or, in some cases, hardware issues. When a customer powers on a new switch and starts it up with two fan modules installed, they find that one of the fan modules is making a loud noise. I am not the sensitive type, but it was very noticeable for someone who has played on my switch fairly regularly. Usually when the fan engages (when I play for a while or a graphic intensive game) it sounds like a.
