The broadband has a splitter but no wires

Overview

Loose wires at socket position and absence of broadband faceplate socket. For new properties with loose broadband wires, first confirm the cables are Openreach terminated. This is missing the isolation which is a relatively important safety feature in terms of protecting devices in your home (particularly those directly attached to the hub/set top box) from electrical issues on the cable feed. Wi-Fi is undoubtedly convenient, without the need for wiring, it allows you to connect multiple devices to the internet with a minimum of fuss.
