The router only has fiber optic ports

Overview

Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled "ONT" or "Fiber"). There are different fiber standards with different usable ports, LC, SC, ST being the most common standards. You cannot replace the ISP-provided ONT with a traditional cable modem, but you can connect almost any wireless router for fiber internet to the ONT's Ethernet port. The use of Wi-Fi 7 is one of the major reasons why this router gets the top spot.

The router only has fiber optic ports

The Best Routers for Fiber Internet: My Expert Picks
