Types of MPO multimode jumpers

Overview

There are many types of transfer MPO jumpers, including ribbon MPO jumpers, bundled MPO jumpers, and PO fan-out through splitters (round or square). MPO (Multi-fiber Push On): MPO is a standard multi-fiber push-pull optical connector interface designed for high-density fiber connections. As an industry-standard interface specification, MPO defines the mechanical structure. Before understanding MPO/MTP® Jumper, Harness, and Trunk Cables, let us first look at what MPO/MTP® cables are and build a basic understanding. The number of connections utilizing MPO cable structure will increase in the coming years to ensure 5G New Radio Metro Transport Network. MTP/MPO cables provide high-density, low-loss, and plug-and-play connectivity that supports 10G, 40G, 100G, and 400G Ethernet in data centers and telecom.
