Using a wired connection to a fiber optic router to increase network speed

Overview

Switches and network adapters with SFP modules allow you to create custom high-speed Ethernet networks. For example, using QSFP+ fiber transceiver modules, you could achieve 40 Gbps speeds across a building. This article will give you an overview of the use cases for fiber-optic networking, some of the terms used in fiber networking, and suggestions for setting up a fiber network. Once you understand the basic concepts, you can check out my Recommended Equipment section toward the bottom of the. However, setting up a fiber optic connection to your router can seem daunting if you're unfamiliar with the process. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid.
