Waterproof distribution box manufacturers tell you that the way to waterproof an outdoor distribution box is to first choose a distribution box made of waterproof material, seal the cable entry points, apply silicone sealant, install a weatherproof cover, use outdoor rated sockets. Usually, rubber sealing rings or sealants are used for sealing to effectively prevent the intrusion of rainwater, sand and dust. The corrosion resistance of the waterproof plug box shell made of stainless steel is significantly improved depending on the chromium content of the water tight electrical box shell, but when the chromium content of the waterproof cable box shell is higher, although the corrosion resistance of the. Moisture inside a waterproof distribution box almost always traces back to one of three root causes: seal degradation, condensation buildup, or mechanical breach. Waterproofing of outdoor electrical boxes is critical to protecting electrical components from moisture and ensuring safety.
