

What are the side panels of a network cabinet

Overview

Rack side panels are panels that are designed to be attached to the sides of a server rack or network cabinet. A server rack or network cabinet is designed to accommodate different technical devices, including routers, network switches, hubs, Ethernet cables, patch panels, and other storage devices. " Such enclosures assist you in systematizing as well as securing the crucial elements of a network infrastructure in a safe, secure, and efficient way.
