What components are used to secure ADSS fiber optic cables during installation

Overview

When installing ADSS optical cables, you need various hardware fittings including ADSS tension (or anchor) clamps for securing the cable to terminal and tension towers, ADSS suspension clamps for supporting the cable along spans, pole brackets and fastening straps for attaching. ADSS cable accessories, such as suspension clamps, tension clamps, and pole attachment hardware, ensure the mechanical integrity, optical behavior, and safety. In this article, we explore some of the primary categories of ADSS accessories, describe how they function, provide guidance on. Generally, optical cables are equipped with matching hardware during construction. This guide provides general recommendations for the selection of methods, equipment, and tools for the stringing of ADSS (All Dielectric Self-supporting) fiber optic cables including short and Long Span ADSS cables.
